

Set-up and technical requirements

High Noon - mobile phone cinemática by *mobileskino*

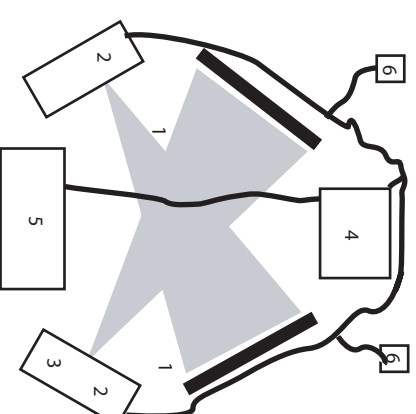

Space needed for standard setup: ca. 10m x 4m, standard room height

www.mobileskino.ch
info@mobileskino.ch

Alternative setup for tight spaces:
ca. 5m x 4m, standard room height

1. Projection screens (back projection)

2. Loop Super8 projectors, 3 on each side. Electronic drivers.

3. Audio mixer, Loop-Audio Tapes

4. Computer, screen and printer for SMS-mode.

5. Old phones (with a dialling disc) and cell phone slots for analogue mode.

6. Speakers

Slide projectors will be set up to show slides with information (SMS registration number) and for the looks.

A small space with a table should be close by for repair work (Super8 loops etc.)

Technical requirements:

- 220V outlet
- Analogue mode: 2 independent phone lines, which allow the impulse dialling of older phones with a dialling disc.
- SMS-mode: internet connection and a local SIM card for a cell phone
- Ambient light: low
- The installation emits different noises.

All projection and audio equipment will be supplied by *mobileskino*.

Analogue and SMS mode run independently and can be switched by mobiles kino at will within a few minutes.

MOBILESKINO / HIGHNOON

technical Set-up

The Installation consists of 2 Filmscreens standing face to face.
For the projection the light has to be dimmed.
